

Application No.: 10/619008

Case No.: 53867US018

---

**Amendments to the Specification:**

Please amend the specification as follows:

On page 10, please replace the paragraph that starts on line 15 and ending on line 21 with the following amended paragraph:

A particularly beneficial class of tacky materials meeting these criteria is the class of (meth) acrylate polymers, preferably acrylate embodiments thereof, suitable for use as pressure sensitive adhesives (PSA's). Representative embodiments of such (meth)acrylate PSA's are described in U.S. Pat. Nos. 4,751,087; 4,737,577; and Re 24,906; and in Assignee's copending U.S. patent application Serial No. 08/968519 filed November 12, 1997 in the names of James E. Garbe et al.; all of which are incorporated herein by reference in their respective entireties.
